Summary

I am an SRE Lead and Platform Engineer focused on building resilient, high-scale distributed systems that balance operational stability with developer velocity. This approach is defined by over a decade of experience encountering and resolving critical production issues head-on, using every challenge to strengthen platform resilience.

I specialize in designing robust architectures and automating operations across both Cloud and On-premise environments. I focus on Infrastructure as Code, Distributed Systems, and Observability to ensure that reliability and security are part of the platform core by design.

I enjoy mentoring teams, contributing to open-source projects, and engaging with tech communities. Sharing what I've learned allows me to collaborate and drive innovation. I'm passionate about problem-solving and always looking for better ways to tackle complex challenges effectively.

Experience

Nexthink

Madrid, Spain

SITE RELIABILITY ENGINEER LEAD

Nov. 2025 - Present

- Leading SRE initiatives and mentoring teams to establish best practices across the organization. My role focuses on ensuring the reliability and scale of our global SaaS platform by driving a consistent engineering culture.
- Global SaaS Reliability: Ensuring the availability and performance of distributed systems serving millions of endpoints worldwide.
- Kubernetes on AWS: Scaling and managing our container ecosystem with a focus on resilient workload distribution and resource efficiency.
- SRE Best Practices: Defining the standards for GitOps and automation to ensure stable and predictable infrastructure delivery.
- Observability Strategy: Leading the approach for system visibility and proactive health management to reduce MTTR and improve platform resilience.
- Incident Management: Refining incident response frameworks and driving a culture of post-incident learning to minimize operational risk.
- Mentorship & Coaching: Mentoring other engineers and leads on SLOs, Error Budgets, and the reduction of operational toil.

Stratio BD

Madrid, Spain

PLATFORM ENGINEER LEAD & SITE RELIABILITY ENGINEER

Sep. 2017 - Nov. 2025

- Infrastructure Leadership: Directed the automation of Kubernetes clusters across Azure, AWS, GCP, and on-premise environments.
- Platform Architecture: Designed resilient platform cores and automated complex workflows using Infrastructure as Code and custom Kubernetes operators.
- GitOps & Automation: Implemented GitOps principles to standardize infrastructure delivery, ensuring stable and predictable deployments across the platform.
- Observability & Reliability: Partnered with stakeholders to implement full-stack monitoring and logging frameworks (Prometheus, Grafana, ELK/EFK) to ensure 24/7 system health.
- Security & Tooling: Integrated security components like Vault and OAuth2 proxies to strengthen platform robustness.
- Customer Success: Guided clients through Kubernetes adoption, tailoring technical solutions to meet specific business requirements.
- Community Contribution: Actively contributed to open-source projects like Kubespray to drive innovation in the Kubernetes ecosystem.

Stratio BD

Madrid, Spain

PLATFORM ENGINEER & DEVOPS ENGINEER

Sep. 2014 - Aug. 2017

- Cluster Automation: Developed automation solutions for deploying and managing Mesos clusters, improving operational reliability.
- Service Integration: Integrated technologies like Etcd, Vault, and Consul to enhance the functionality and security of distributed environments.
- Platform Optimization: Provided technical expertise in platform adoption and customization based on specific client needs.
- Collaboration: Worked within the team to drive continuous improvement and innovation in our deployment workflows.

Wayra (Telefónica)

Madrid, Spain

MOBILE GAME DEVELOPER

Jul. 2013 - Aug. 2014

- Responsible for building and deploying multiplatform mobile games into one of their start-ups at Wayra, a start-up accelerator initiated by Telefónica.
- Created cross-platform mobile games for a top retail brand using Unity, ensuring seamless gameplay across iOS and Android devices.

Freelance

Madrid, Spain

MOBILE APPLICATION DEVELOPER

Jan. 2011 - Jun. 2013

- Built multiplatform mobile applications including game applications with Unity3d, Android native, iOS native, and HTML5 based applications with Phonegap.

Skills

SRE	Distributed Systems, Disaster Recovery, Incident Management, SLI / SLO / SLA, Error Budgets
Platform	Infrastructure as Code, Kubernetes, Terraform, Ansible, Helm, Flux, Linux, On-premise
DevOps	GitOps, Jenkins, CI/CD
Cloud	Amazon Web Services (AWS), Google Cloud Platform (GCP), Microsoft Azure
Observability	Datadog, Prometheus, Grafana, OpenSearch, Kibana
Programming	Go, Python, Bash
Languages	Spanish (Native), English (Professional)

Certificates

2021 **CKA - Certified Kubernetes Administrator**, The Linux Foundation

Education

UPM(Universidad Politécnica de Madrid)	<i>Madrid, Spain</i>
TELECOMMUNICATION ENGINEERING (Ms. OF Sc. ABET/AEC ACCREDITED)	<i>Mar. 2008 - Aug. 2014</i>
